Application

The compact 006-IFC Flanged Cartridge Circulator with an Integral Flow Check (IFC®) is designed for the circulation of hot or chilled water in a wide range of closed loop applications. Typical uses include secondary hydronic heating zones, radiant injection mixing, and hydro-air fan coil heating/cooling. The IFC® feature replaces a separate in-line flow check, reduces installation costs and improves system performance. The unique, replaceable cartridge contains all of the moving parts and allows for easy service instead of replacing the entire circulator. Available with optional Variable Speed control or Priority Zoning control with built-in transformer, relay, and priority switch in one complete package to make it ideal for zoning.
